

## Devro

Devro considered IFFA a great opportunity to showcase its latest product, Devro Select, which has been specifically designed to replicate gut and offer all the benefits of collagen including full tractability back to farm. Many existing customers, as well as new customers, visited the company's stand.

[www.devro.com](http://www.devro.com)

## Marel

Marel launched several innovative solutions for primary, secondary and further processing of meat. The V-Pump, a belt-wide piston pump, won the 'Best Innovation Award'.

Combined with the highly regarded RevoPortioner it offers a higher product quality, up to 5,000 kg per hour, with virtually no loss of raw material.

## Essentia Protein Solutions

Protein ingredients specialist Essentia's 'Taste & Talk Corner' demonstrated how the novel use of proteins can reduce cost and improve the quality of meat products.

Essentia's meat experts revealed new recipe ideas, and showed how its protein solutions, such as its ScanPro™ and APro™ brands, can help develop nutritious and healthy profile foods

[www.essentiaproteins.com](http://www.essentiaproteins.com)

## Multivac

Multivac showcased a variety of packaging concepts specifically tailored for producers within the meat industry. The portfolio included new packaging solutions for sliced meat products, machinery designed to increase efficiency and reduce energy consumption and automated tray sealing and thermoforming solutions designed for the production of Multifresh™ vacuum skin packaging.

## Clarke Fussells

Clarke Fussells had a very successful show at IFFA offering its services as a food machinery auctioneer and broker.

Clarke Fussells works on a straight sales commission basis and obtains the maximum value for surplus machinery. The company says it can also source the right machinery at the right price to suit customers' requirements. This can be an individual item or the complete contents of a factory.

**For full details contact Clarke Fussells on +44 (0) 1225 874677**

## Treif

Treif UK saw most major players at IFFA from the UK and Ireland. On its 750 m2 stand it presented complete line solutions, from fixed weight bone-in chops to boneless steaks, including robot loading into pre-made trays or thermoforming equipment.

Treif also launched the new Frozen dicer, the AVITOS, and was seen running live dicing trials on the stand with diced bacon at -12 degrees.

[www.treif.com](http://www.treif.com)

## Dantech

Dantech recorded great success at IFFA with many new enquiries and orders. The company described the show as a great exhibition for manufacturers to meet with new and existing customers.

Dantech says it was one of few British firms represented and once again found IFFA to be an excellent and cost effective shop window for the best of British manufacturing.

[www.dantechuk.com](http://www.dantechuk.com)

## Ishida

A busy stand throughout the entire exhibition saw much interest in Ishida's tailored solutions for a variety of protein applications. Three dedicated lines and a variety of stand-alone equipment from the company's market-leading weighing, batching, grading, traysealing, X-ray inspection and leak detection equipment demonstrated Ishida's ability to create fully-integrated packing lines.

## OCS Checkweighers

OCS Checkweighers says it had great success with its new Vision-X-ray Inspection combo, the SC-V. Operated by one single HMI, this compact machine is said to perform contamination and optical label inspection in one unique process. On the dynamic weighing side, OCS presented its enhanced IP 65 and IP 69K checkweigher family, featuring easy cleaning and handling.

## Viscofan

IFFA 2016 was the global showcase for Viscofan. It offered the opportunity to highlight the global presence of the company and display a wide range of products in the casing industry. Viscofan says the event was a complete success for the cellulose, collagen, plastic, fibrous technologies and the Coffinet-T joint venture with Trunet.

[www.viscofan.com/EN/](http://www.viscofan.com/EN/)

## Grote

Grote showcased its fully automated line for sandwich production and its new generation of Log End Slicer. Now that a successful IFFA 2016 is over, the company would like to thank all customers, distributors, service providers and employees involved.

For further inquiries or more information about Grote's products, contact [sales@intl.grotecompany.com](mailto:sales@intl.grotecompany.com)

[www.grotecompany.com](http://www.grotecompany.com)

## Krehalon

Krehalon revealed its new brand image and corporate identity at IFFA 2016. In addition, the company also launched a new range of shrink barrier films incorporating high barrier, high shrink and especially secondary seal properties which, when combined with automation options, are said to offer improved presentation, shelf life and potential yield benefits

[www.krehalon.com](http://www.krehalon.com)

## Kalle

Kalle presented its first ever range of Clean-label Casings at IFFA in response to changing consumer expectations.

The company says these new value-added products can transfer smoke, colour and/or flavouring directly to the filling surface but without the use of preservatives or artificial colouring. They are also entirely allergen-free

[www.kalle.de](http://www.kalle.de)

## Handtmann

[www.handtmann.co.uk](http://www.handtmann.co.uk)

Handtmann officially launched its new range of VF 800 Vacuum Filling Machines which attracted much interest, and gained several prestigious industry awards. This new series of machines represents defining innovation with unique features aimed to take Vacuum Filling to a new level, and into associated production.

Handtmann also experienced interest in its new series of GS Automatic Collating Systems for loading fresh sausages into trays to remove manual intervention.

## Sealpac UK

IFFA saw Sealpac UK showcase its flexible A Range Traysealers with the latest High Speed TraySkin® X Plus application capable of reaching traditional MAP speeds along with the cost saving EasyLid® application for the convenience sector. Maintaining the Sealpac philosophy all applications are a simple tool change on the one machine.

[www.sealpac-uk.com/](http://www.sealpac-uk.com/)

## RAPS

With the theme of 'Trends, Taste and Technology', RAPS showed its skills and addressed current market drivers such as freshness, convenience, vegetarian alternatives, salt reduction and clean labelling. The ingredient specialist presented a fiery chili range and visitors were invited to taste new products in the 'Performance Food Market'.

[www.raps.com](http://www.raps.com)

## Accles and Shelvoke

Accles and Shelvoke showcased what the company says is the world's largest and most popular range of captive bolt stunners. The entire range of tools were on display, including the Cash Magnum XL. Accles and Shelvoke says this is the world's most powerful stunning tool and it attracted the attention of major global producers.

[www.acclesandshelvoke.co.uk](http://www.acclesandshelvoke.co.uk)

## CSB

Global IT Excellence for the Smart Meat Factory was the key theme of CSB's participation at IFFA. While today's industrial systems are still controlled from one central point, the future will see intelligent manufacturing systems with communication between machines, equipment and products. CSB demonstrated how its software, image processing and automation solutions will successfully manage this digital transformation.

[www.csb.com](http://www.csb.com)

## Bizerba

Automation, individualisation, safety, hygiene and energy efficiency were key to Bizerba's presence at IFFA. The company, which will celebrate its 150th anniversary this year, demonstrated software and machines impacting the entire value chain. Products being demonstrated included mincers, bone saws and fully automatic slicing solutions as well as industrial software.

[www.bizerba.com](http://www.bizerba.com)

## Industrial Auctions

For Industrial Auctions, a specialist in online auctions of machinery for the complete food industry, IFFA 2016 was a great success. Satisfied buyers from all over the world, companies who were looking for machines and those which wanted to sell machinery all visited the stand.

[www.Industrial-Auctions.com](http://www.Industrial-Auctions.com)

## Deighton Manufacturing

After attending the IFFA exhibition for over 30 years, Deighton Manufacturing says that IFFA 2016 has been the best they have ever attended. Deighton signed contracts with new and existing clients from Jordan, South Africa, Vietnam and Europe. In addition, they had a fantastic number of qualified enquiries

[www.deightonmanufacturing.co.uk](http://www.deightonmanufacturing.co.uk)

## Provisur Food Processing Equipment

Provisur exhibited its newest innovations for grinding, mixing, separating, forming, coating, heat treatment, slicing and autoloading that increase throughput and deliver high quality products at the lowest cost of ownership. Advanced slicing systems (CashinEDGE®) for bacon and (PowerMax®) for bacon and luncheon meat with flexible overlapping capabilities increase productivity and yield. Excellent slice quality and presentation are assured.
